## REFERENCE LETTER

Alias Sp. z o. o. is pleased to confirm the fact of successful deployment of Geospatial Network Inventory (GNI) system in the scope of design and management of company's optical fibre network.

We would like to confirm Softelnet's well qualified personnel that proved their professionalism with regard to whole software deployment process. Professional approach to analysis of our network architecture and provided as-built records was a crucial factor for effective system configuration and training performed for Alias network engineers. Effective communication with Softelnet's team enabled us to achieve system business readiness in a very short time.

Continuous and on-line Softelnet's support for our inventory team led to seamless migration of 560 kms of our optical network into GNI system exposing its data in wide variety of views to our salesforce, service delivery and service assurance units.

With full confidence we can recommend Softelnet company with their cutting-edge 'Design & inventory' approach to other operators. A perfect cooperation and knowledge transfer to Alias personnel was key of successful deployment of GNI system.

*Alias Chairman of the Board*
